

3M™ Scott™ Ska-Pak™ AT Supplied Air Respirator

Automatic-Transfer, Added Peace-of-mind.

The Ska-Pak AT respirator is the most advanced pressure demand supplied air respirator from 3M Scott Fire & Safety, equipped with the added benefit of a patented, automatic, hands-free air transfer capability.

If the primary air supply to the respirator is interrupted, the air source is instantly switched to the portable air cylinder without user intervention. Upon transfer, the Vibralert tactile alarm system activates, vibrating the user's facepiece and alerting the user that the respirator has transferred to cylinder air.

The Ska-Pak AT supplied air respirator is ideal for many applications, including confined space operations, hazardous materials clean-up and maintenance jobs for numerous markets, including chemical, petrochemical, oil and gas, ship building and public utilities.

Product Highlights

- Combination Type C positive pressure respirator with escape cylinder for entry and escape from hazardous, confined space or immediately dangerous to life or health (IDLH) situations
- Automatic, hands-free transfer from external air source to cylinder in the event of primary air source interruption to help reduce worker panic
- Personal, tactile Vibralert alarm to alert users of transfer to cylinder air and enable prompt escape
- Onboard cylinder gauge and 90% air remaining lighted alarm for added safety and awareness
- E-Z Klip cylinder retention system for quick and easy cylinder changes
- Three harness styles:
 - Padded Polypropylene - chemically resistant and lightweight
 - Padded Kevlar® - ideal in high heat environments or when there is potential for sparking
 - Integrated Full Body Harness - ideal for confined space applications

Part Number
Select a one- or two-digit number per box from the chart above that corresponds to your choice.

SAR	4	2			0						1
-----	---	---	--	--	---	--	--	--	--	--	---

- If you prefer an alternate facepiece style, head harness or size, choose "none" and order an approved facepiece as a separate line item.
- Cases are not compatible with select Ska-Pak AT respirator configurations and Ska-Pak AT respirators configured with full-body harnesses (FBH). Please choose "none" for case options and order case separately as required, noting that fit on all configurations cannot be guaranteed.

Example Configurations

SAR	4	2	3	03	0	4	4	1	0	0	1
	AT	Entry/Egress	3000 psi	10 min Carbon	Placeholder digit	Kevlar® Harness	E-Z Flo Vib. QD	Hansen fitting	No FP*	No Case*	One per box
SAR	4	2	4	06	0	4	4	1	(0)	0	1
	AT	Entry/Egress	4500 psi	15 min Carbon	Placeholder digit	Kevlar® Harness	E-Z Flo Vib. QD	Hansen fitting	No FP*	No Case*	One per box

* In these examples, order facepiece and case separately.

Hands-Free to help Reduce Panic

The Ska-Pak AT is a Type C combination supplied air respirator with the added benefit of automatic, hands-free transfer capability. If your primary air source is interrupted, you are automatically transferred to your egress air cylinder.

Regulator

The E-Z Flo pressure demand regulator with Vibralert tactile alarm notifies the wearer of transfer to cylinder air by vibrating the facepiece.

EOSTI

A pressure gauge and flashing electronic indicator notifies the user of cylinder status and alerts the user when cylinder pressure is low.

Harness

The nylon and Kevlar® harnesses are lightweight with padded adjustable shoulder straps for maximum comfort. An integrated full-body harness (FBH) is also available, ideal for confined space applications.

Cylinder Options

The Ska-Pak AT Supplied Air Respirator is available with numerous rated cylinders, featuring the E-Z Klip cylinder retention system:

- 3-minute 2216 psi aluminum
- 5-minute 3000 psi carbon
- 10-minute 3000 psi carbon
- 15-minute 4500 psi carbon

Air Line Fitting

Available with Hansen, Schrader, Cejn, Hansen HK plug or Hansen HK socket fittings.

Facepieces

The Ska-Pak AT Supplied Air Respirator is used with the AV-Series facepieces which feature the 3M Scott Top-Down Convertibility platform, allowing one facepiece to be used in numerous respiratory protection applications, from supplied air to air purified. This one-facepiece concept reduces inventory and training costs and eliminates the need to fit-test multiple facepieces for each employee.

WARNING
These respirators help to protect against certain airborne contaminants. Before use, the wearer must read and understand the User Instructions provided as part of the product packaging. A written respiratory protection program must be implemented meeting all the requirements of OSHA 1910.134 including training, fit testing and medical evaluation. In Canada, CSA standards Z94.4 requirements must be met and/or requirements of applicable jurisdiction, as appropriate. Improper use may result in sickness or death. For correct use, see supervisor and User Instructions, or call 3M PSD Technical Service in USA at 1-800-243-4630 and in Canada at 1-800-267-4414.
