

# PlusLearning™

## A ZOLL Rescue Ready Service

### Training: AEDs + CPR Save More Lives

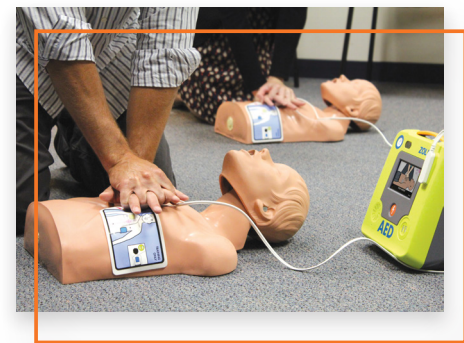

When sudden cardiac arrest (SCA) strikes, a victim's best chance of survival depends on an AED in the hands of a trained responder. And training must comply with state and local regulations. PlusLearning classes support your AED program by providing the training your volunteer responders need – where they need it. Customize AED and CPR training to suit your needs with Rescue Ready® services.

### Broad Training Network

With PlusLearning classes you will benefit from our international network of experienced, accredited trainers who have conducted training all over the world. In the U.S. and Canada, these trainers are clinicians or emergency medical personnel accredited by the American Red Cross, the American Heart Association, or both. You can have confidence your volunteer responders will be trained by the best in the business, using training equipment that matches the AEDs in your program and conforms to your local regulations.

### Where and When You Need It

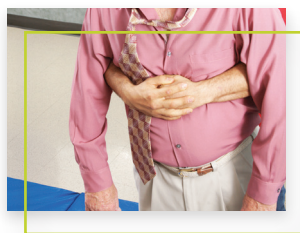

Simply let us know what kind of training you need, how many volunteer responders you need to train, and where you want classes to take place, and we'll do the rest. Our trainers are happy to work on-site in your facility, or they are available for remote sessions. We will even design a blended program that includes both in-person and virtual classes.

# PlusLearning Classes

Class Type	Class Size		Where	How	Skills Test
	Minimum	Maximum			
In-person (traditional)	5	12	Your facility	Hands-on	On-site
Virtual	3	N/A	Online	Self-paced	Live instructor via web
Blended	5	12	Online and your facility	Self-paced	On-site

## AED/CPR | 3.5 hours

CPR/AED use, relief of choking, pediatric CPR, and use of mouth-to-mouth barrier devices for all ages.

## First Aid/AED/CPR | 5-6 hours

How to manage illness and injuries in the first few minutes until professional help arrives, including general principles, medical emergencies, injury emergencies, CPR and AED usage, and pediatric CPR. Optional topic: Environmental emergencies.

## Pediatric First Aid | 7.5 hours

How to manage illness and injuries in a child in those first few minutes before professional help arrives. Topics include first aid basics, medical emergencies, injury emergencies, environmental emergencies, and CPR/AED use. Optional: Additional first aid topics.

## Bloodborne Pathogens Awareness Program | +2 hour add-on to any of the above

This class will help at-risk employees understand bloodborne pathogens and how to reduce exposure risks. The program assists in satisfying the training requirements of the U.S. Department of Labor and the U.S. Occupational Safety and Health Administration's Bloodborne Pathogens Standard.
